

Questions Call for tender - Quantitative Research Services

(last update: 28/04/2026)

Lot I (no questions received so far)

Lot II

1. How will you evaluate different ways of pricing?

Answer: We recognize that different providers calculate value in different ways, whether by volume, licenses, etc. You should choose the option that most accurately reflects how your costs are incurred.

Once you have selected your preferred model, please use the specific metrics below to calculate a Total Annual Fixed Fee. Your submission should be based on the delivery of:

- 50.000 completes per annum.
- 4 User Licenses per annum.
- 3 survey waves covering 12 countries.
- 2 survey waves covering 18 countries.

Regardless of which of the four models you select, our evaluation will focus on the total cost for that annual output.
